Experiment

Liverpool L69 3GH, UK

University of Liverpool

Think you could make decisions under high levels of pressure and uncertainty ?

We are seeking volunteers who play video games to take part in a psychology experiment which aims to examine Air Defence Operators' decision making in the highly stressful, time pressured and complex environment of a ship's operations room. In this experiment you will take on the role of an Air Defence Operator and be required to make a series of decisions during a simulated mission.
