

Call For Participants

Healthy volunteers wanted for an fMRI study on medication action in ADHD

180 min(s) to complete

£70

Experiment

Institute of Psychiatry Main Building, Camberwell, London SE5 8AF, UK

King's College London

This study looks at how Attention Deficit Hyperactivity Disorder (ADHD) medications influence the brain of ADHD adolescents. To fully understand what these drugs do in the ADHD brain, we first need to know how the brains of healthy adolescents work. This is where you can help us!

Please note that you will not need to take any medication in this study.
