Risk analysis of transport logistic network

25 min(s) to complete

Sincere Gratitude

Online Questionnaire

Online

Liverpool John Moores University

The study aims to propose a novel risk management methodology to identify, evaluate and mitigate the causal factors on the deterioration of quality in the transport logistic chain. The purpose of the questionnaire is to develop a contextual framework to evaluate the cause/effect of quality deterioration in the transport logistic chain. I would be very pleased if you can take part in this study given your professional knowledge in the food supply network or transport logistic chain
