A study about how Big Data collection and privacy impacts our lives

5 min(s) to complete

Sincere Gratitude

Online Questionnaire

Online

Lincoln University

This is a survey for a dissertation project which aims to research the effects of big data and data collection on our lives and businesses in past and present.

Big Data is a emerging term for data which is collected on a even greater scale than before, it relates to the usage of IoT(Smart Home) Devices, sensors in our smart phones and technology embedded into public areas in order to gather and process as much information as possible to find out our habits and behavioural patterns.
