Exploring Environmental Concerns Surrounding Vaping

10 min(s) to complete

Sincere Gratitude

Online Questionnaire

Online

University of Gloucestershire

This study seeks to understand the environmental perceptions of individuals who use vaping devices. This stems from the lack of consideration for user perspectives within political and academic research, particularly concerning unique perceptions. Questions in the survey are focused on attitudes, beliefs, values, knowledge and vaping device usage. All information shared within this study will be handled with due diligence and will be used to produce an unbiased report.
