Can You Spot A Phishing Email?

20 min(s) to complete

Sincere Gratitude

Online Questionnaire

Online

Aberystwyth University

Can you spot when you are being phished? Identifying fraudulent emails can be difficult. Phishing is an attempt to trick you to give up your personal information by pretending to be a reputable business. Can you tell what email is fake?

As part of a PhD project at Aberystwyth University, we are conducting an online survey to test how well you can distinguish between phishing (fraudulent) and genuine emails.
