Call For Participants

Study on Visual Size Perception Wearing Contact Lenses

4 hour(s) to complete

£60 for 4 hours

Experiment

Ashby St, Clerkenwell, London EC1V, UK

City University London

We are recruiting participants for a study on how well people are able to judge changes in the visual size of a target. The study will involve wearing contact lenses. You will look at a series of targets and tell us whether they appear to get bigger or smaller. The actual test itself should only take 90 minutes, but we have scheduled 4 hours to give ample time for the contact lenses to be fitted and for you to take regular breaks over the 90 minutes.

Study at City, University of London
