voucher based on continuation
and...

Questionnaires by telephone and
on paper to complete at home

Claverton Down, Bath BA2 7AY,
UK

University of Bath

Many cancer survivors experience physical symptoms, including pain and fatigue, whilst others do not. We would like to investigate whether the way cancer survivors think and feel is affected by the physical symptoms that they experience. This could help services to design more effective psychological therapies to support people to manage their emotional wellbeing better.
