

Call For Participants

Investigating Digestion of Macronutrients in Healthy and Obese Volunteers

2 week(s) to complete

£410 plus travel expenses

Experiment

White City, London, UK

Imperial College London

The Section of Endocrinology and Investigative Medicine at the Hammersmith Hospital, London is studying the effect of meals of varying nutrient content on appetite.

We are looking for healthy weight and obese volunteers to take part in this study.

This study will involve a 4-day stay in our research facility, where you will complete a variety of questionnaires, have blood taken, and to monitor how people digest food,
