Experiment

Alexandra House, 17-19 Queen
Square, London WC1N 3AZ, UK

University College London

We would like to invite you to participate in a study investigating the effects of benzodiazepines on anxiety-related cognition and behaviour. It is hoped that this research will contribute to an improved understanding of anxiety-related disorders and how to treat them. We are investigating the effects of a single dose of lorazepam, a drug used to treat anxiety and insomnia, on cognition and behaviour.
