How Electrical Stimulation Reshapes Our Ability to Juggle Multiple Tasks

3 hour(s) to complete

£35

Experiment

University College London

This experiment involves eye-tracking and transcranial direct current stimulation (tDCS), a safe, non-invasive brain stimulation technique. The experiment includes two parts: the first session lasts for 2 hours, and the second session (one week after the first session) lasts for 1 hour. You will receive £35 for completing both sessions.

2 Wakefield St, London WC1N
1PF, UK
