Exploring the transition to
adulthood for young people
with ADHD

2 year(s) to complete

£30 for every three months in th
study (£240 total)

Online Questionnaire

Online

King's College London

Adolescence can be a challenging period for
young people with ADHD, with major life
transitions, new demands, and increased
expectations.

In the current study, called ART-transition,
we seek to observe young people with
ADHD in their transition into adulthood using
Remote Monitoring Technology (RMT).
More specifically, we aim to investigate the
changes that takes places, what predicts
these changes, and how can we prevent
negative outcomes and support healthy
