School closures and the impact
on rural community
sustainability

10 min(s) to complete

Sincere Gratitude

Online Questionnaire

Online

University of Aberdeen

The purpose of the research is to gather information about the impact of school closures and the effect this may have on other local services and the residential decision making of households with and without school age children. Promoting the sustainability of rural communities is a current policy priority for local and national government and this research will contribute to debates about the relationships between local schools and wider rural community sustainability.
