

Call For Participants

Influence of walking on diabetes risk in South Asian vs white European men

40 hour(s) to complete

Health report worth £2000 with a MRI scan + travel expenses

Experiment

Loughborough LE11 3TU, UK

Loughborough University

The influence of prior walking on coronary heart disease risk markers in centrally obese South Asian and white European men. You will be required to visit the laboratories at the National Centre for Sport and Exercise Medicine, Loughborough University, on six occasions. You will receive a comprehensive health check and report, including an MRI scan, ultrasound scans for blood vessel function, information on coronary heart disease risk markers and your fitness data.
