Call For Participants

The Effect of Alcohol Hangover on Response Inhibition and Attentional Bias

University of Bath

This study will examine the effects of alcohol hangover on cognition. If you decide to participate you will be asked to attend one screening session and two testing sessions at the University of Bath. In one session you will be required to be experiencing a hangover, and in the other you will be asked to abstain from alcohol for 24 hours. During the testing sessions you will complete some questionnaires and then some computerised tasks combined with eye-tracking.
