

Call For Participants

Combined effects of hypoxia
and mental fatigue on
physical performance

7 hour(s) to complete

Cash - £90

Experiment

Loughborough, UK

Loughborough University

The study assesses the effect of induced cognitive fatigue on human performance at high altitude. Participants will be evaluated under hypoxic conditions (reduced oxygen, equivalent to 4000m altitude) during exercise at high physical workloads, to determine the relationship between body hypoxia and mental fatigue on prolonged physical performance.
