Supermarket voucher £30

Interview via phone, skype,
zoom, or another internet
conferencing application.

Online

University of Sussex

This study examines home energy and transport use and affordability in the UK. The UK is moving to a low-carbon society, with an increased use of renewable energy and sustainable transport options. We want to interview people either online or by phone to collect new information on both energy use at home and how households use transport. Our study aims to examine past and present home energy and transport needs in UK households to inform how to develop future government policies.
