

# Call For Participants

How new information can  
influence memory

12 min(s) to complete

Sincere and forever gratitude for  
making the life of a stressed  
student a bit better.

Online Questionnaire

Online

University of Bristol

This study aims to determine if memory for new facts can differ depending on how the information was initially presented. It also aims to compare such memories at two different time points (immediately and 5 days later). An email address will be required for the second session link to be sent. Session 1 takes around 10 minutes. Session 2 takes about 2 minutes.
