Universitat de Barcelona

If you plan to study English abroad, you might be interested in the linguistic gains you'll make after a term or a year overseas. So are we! In our research, we explore the relationship between language learning and study abroad experience, along with factors like individual differences, which may influence second language acquisition. If you take part in ERASMUS or another mobility student exchange program, we will help you see how much progress you've made after studying abroad.
