University of York

My research is investigating how aspects of the caregiving environment can play a role in the emotional wellbeing of parents and children. The study focusses on how parents think about/interact with their child, and their views on their wellbeing, and that of their child. The aim is to help establish how best to support parents to promote the wellbeing of both themselves and their children. Also, within adoptive families, we aim to establish factors that contribute to the success of placements.
