

Call For Participants

Familial Risk for Depression

10 min(s) to complete

Sincere Gratitude for the survey completion.

Online Questionnaire

Online

Queen Mary University of London

This study is designed to examine some differences in healthy individuals with and without a close relative with depression. We would like to invite you to complete a screening survey, from which we will recruit eligible volunteers for our upcoming paid experiments on familial risk for depression that will take place in Queen Mary University of London, Mile End. We will contact you soon if you happen to be eligible and agree to be contacted.
