Online Questionnaire

Online

University College London

We are looking for children aged 10-13 year old and their parents to take part in a healthy eating study. As part of this you will be invited to complete a questionnaire and a short and fun computer task.

The aim of this research is to understand how children interact with food and how their eating habits develop. This study will test new instruments developed as part of a large ongoing twin study (the Gemini study) hosted at UCL.
