

Call For Participants

Internet Use by people with
Early Onset Dementia and
their families

15 min(s) to complete

Sincere Gratitude

Online Questionnaire

Online

University of Nottingham

The aim of this research project is to understand how people with working age dementia (diagnosed before the age of 65), and their family members are accessing and using the internet. The aim is to shine a light on your experiences, and the responses you provide will be extremely valuable to the researcher. These answers will allow the researcher to better understand the needs of your group on the internet, which can be used to better promote appropriate support and services after diagnosis
