

# Call For Participants

Does sensitivity to the world around us affect our emotions and behaviors?

15 min(s) to complete

Sincere Gratitude

Online Questionnaire

Online

University of Sheffield

Each of us have different levels of sensitivity for sensory stimuli in our environment. For example, how bothered are you by itchy labels in clothing, fluorescent lights that flicker, or a tap that won't stop dripping?

We are interested in how level of sensory sensitivity can affect our emotions and behaviors, and if this relationship between sensory sensitivity, emotions and behaviors changes at different points in our lives.
