Eye-tracking Study: Exploring Listening Effort in Speech Perception

80 min(s) to complete

Online Shopping voucher

Experiment

London WC1N 1PF, UK

University College London

You will listen to acoustically degraded sentences in the experiment. After listening to each sentence, you will need to repeat what you heard aloud. While listening to the sentences, your pupil dilation will be recorded using an eye tracker. Additionally, you will undergo a hearing threshold test and a cognitive test as part of the experiment. The entire experiment will last approximately 1 hour and 20 minutes, and you will receive a £12 Amazon voucher.
