## Mental Health Outcomes in Mothers of Colicky Babies.

35 min(s) to complete

Prize draws( 5 x £20 for screening, further 10 x £25 for full questionnaire)

Online Questionnaire

Online

University of Southampton

The study will explore whether infantile colic has implications for maternal mental health and whether there are any other factors that influence this possible relationship.

The study is recruiting people who are...

- Mothers aged 18 and over
- Mothers will have given birth in the previous 12-26 weeks.
- Mothers will be living with their infant
- Mothers with babies experiencing colic
- Mothers with babies who were born
