Menopause and Muscle repair

University of Nottingham

6 hour(s) to complete

Cash £75 and commuting costs

Experiment

Queen's Medical Centre, Derby
Rd, Lenton, Nottingham NG7
2UH, UK

Interested in how menopause affects muscle recovery? We are recruiting healthy pre- and post-menopausal women (40–60 yrs) not on HRT or hormonal contraceptive for a study at the University of Nottingham. The study involves four visits, including exercise, blood samples, and muscle biopsies to examine muscle repair. Participants will be compensated for their time.
