Ethnographic Study

Oxford, UK

University of Oxford

The Internet of Things brings a manifold of different devices to our homes. We use smart voice assistants to play music, ask for the weather, and order things online; we use smart TVs for entertainment; our kids use smart toys, have their own tablets, and mobile phones; we might secure our home with cameras and motion sensors.

We are interested in how you as a household might be using such devices, even if you don't own any yet! We will get them for you. Get in touch!
