

Call For Participants

Participants needed for study
investigating fats and
appetite

3 week(s) to complete

Online Shopping voucher (£30
Amazon Voucher), Breakfast and
lunch on each visit, and...

Experiment

Headington Campus, Headington
Road, Oxford OX3 0BP, United
Kingdom

Oxford Brookes University

This study aims to compare the satiating
properties of two 'functional' fats:
medium-chain triglycerides (MCT) and
conjugated linoleic acid (CLA), and the
mechanisms behind any observed
differences.

The study involves three visits to our lab.
You will consume a breakfast containing
each of the fats (on each day), after which
blood samples (via cannulation),
questionnaires relating to appetite, breath
tests (which involves blowing into a tube)
are taken before you consume a buffet
