Interview

London, UK

University of Hertfordshire

I am a doctoral student from the University of Hertfordshire looking to recruit participants with a diagnosis of Mild Cognitive Impairment. We want to understand age-related changes in mind-wandering, particularly in people with mild memory problems. This knowledge will help us improve how we care for people with memory problems. We can arrange to visit you at your home for a 90 minute session to explore thoughts that pop into your mind and complete pen/paper tasks to assess your memory skills.
