Computer Memory Task,
Questionnaire

Department of Psychology,
Downing Pl, Cambridge CB2 3EB
UK

University of Cambridge

In this study, you will complete a computer-based memory task where you'll learn and recall the locations of different objects. While you perform the task, you will wear forehead sensors that monitor your brain activity. After the memory task, you will be asked to complete a short questionnaire about your lifestyle. The study will take approximately 2 hours, and you will receive £20 for your time. The study will occur at Cambridge University's Behavioural and Clinical Neurosciences...
