

Call For Participants

Predictors of Anxious Thinking Styles in Mothers

40 min(s) to complete

Prize draw to win one of 2 x £50
or 4 x £15 shopping vouchers

Online Questionnaire

Online

Nottingham Trent University

An online survey investigating the predictors of maternal anxiety by asking questions relating to personality factors, parenting confidence, support, attachment, birth experience and complications, satisfaction with healthcare, and mental health diagnoses. Findings would help inform mental health practitioners about individual differences in symptoms and onset of anxiety in some mothers.

You have the option to leave your details for a prize draw or to remain anonymous.
