Relationships and Sexuality in Early Adulthood

35 min(s) to complete

Sincere Gratitude

Online Questionnaire

Online

Deakin University

Researchers at Deakin University are looking to better understand the experiences of sexuality and relationships, that are unique to individuals as they approach young adulthood. The main aim of this research is to investigate the issues and challenges; as well as the positive factors that males and females face in their pursuit of a healthy sexual development and fulfilling romantic and sexual life, while also learning about how these experiences differ from those with Autism Spectrum Disorder.
