Auditory Imagery Study

90 min(s) to complete

£10 Amazon Voucher

Experiment

Fitzrovia, London W1W 6UW, UK

University of Westminster

Think of the chorus of your favorite song, how clearly can you hear this in your mind? The auditory study investigates how clearly we are able to form sounds (e.g. songs and voices) within our mind, and how accurate we are at forming these representations. The study is based at the University of Westminster, and will last 1 hour 30 minutes during which you will undertake 4 computerised tasks and several questionnaires. You will be given a £10 Amazon voucher for your time.
