## Schizotypy and attention - a three part study

3 hour(s) to complete

Shopping voucher

Computer experiments,  
Questionnaires

Nottingham, UK

Nottingham Trent University

The research is part of a QR (quality-related research) funded project investigating differences in attention under realistic environment for people varying on a personality trait called schizotypy. Participation in this study involves completing some computer-based experiments and demographic, sleep, and personality questionnaires. The study involves three sessions which each last approximately 1 hour. We will reimburse your travel and provide £24 in vouchers for your participation.
